PTR 32 GEN 2 Magazine Policy

- PTR ships each 32 series product with a polymer AK-47 magazine.
- PTR recommends the use of Magpul AK-47 magazines for best results.
- GEN 2 PTR 32 series products are designed to function with the majority of available AK-47 magazines. PTR recommends the use of Magpul AK-47 PMAGs due to their optimal function, wide availability, and value. PTR will warranty the efficient function of commercially available, new production AK-47 polymer magazines in the GEN 2 PTR 32 series products. Many types of steel or aluminum military surplus magazines will function in the GEN 2 PTR 32 series products, however due to the wide variety of manufacturing tolerances in use, PTR cannot warranty the functionality of military surplus AK-47 magazines in the GEN 2 PTR 32 series platform.
- Due to the variations in AK magazines made by different countries, you may find that not all AK-47 magazines will work. PTR typically finds that 7 out of 10 random magazines work, and that the customer may need to mark the magazines that specifically work with the PTR 32 series. The PTR 32 series will not work with bolt hold open magazines. The 32 series will work with Pro Mag AK drums. The 32 series will not work with metal AK drums.
